**SUPPLEMENTARY INFORMATION:** On September 15, 1995, the Commerce Department's National Institute of Standards and Technology will hold an exploratory workshop on developing Federal Information Processing Standards (FIPS) for key escrow encryption, specifically to include software implementations. This effort is being initiated to further the Administration's commitment to federal use of key escrow encryption.

Industry representatives and other interested parties are invited to the workshop to provide their perspectives on the desirable characteristics of key escrow encryption standards to NIST and other federal officials. Government representatives also will present their objectives and preliminary approach to this standards development process. Discussion will also include proposals for follow-on activities.

For discussion purposes, one initial option for this standards activity may be to create a generic key escrow encryption standard containing criteria for federal use of key escrow techniques implemented in either software or hardware. This high-level standard could then be supplemented with lists of validated key escrow techniques. (Currently FIPS 185, "Escrowed Encryption Standard," a hardware-based standard, is the only FIPS-approved key escrow technique.) Guidance would also be needed to guide selection of appropriate key escrow techniques for particular applications. Key escrowing will be used by federal agencies (and others, if they so choose) in conjunction with FIPS-approved encryption techniques. Development and implementation of such standards are necessary to guide federal agencies in effectively and securely implementing key escrow encryption.

The meeting is open to the public, although seating is limited to approximately 100 individuals. Presentations may be limited in length to accommodate all speakers. No detailed agenda has been set yet. NIST reserves the right to cancel any part of the meeting.

**Authority:** Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Pursuant to the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing (ATC), the limits agreed upon by the Governments of the United States and Colombia, as notified to the Textiles Monitoring Body (TMB), are being amended to establish limits for the period beginning on January 1, 1995 and extending through December 31, 1995. Since Colombia is now a member of the World Trade Organization (WTO), the limits published in the **Federal Register** on April 5, 1995 (60 FR 17319) are being amended. Pursuant to the ATC, these new limits supersede those notified to the TMB contained in the Memorandum of Understanding (MOU) dated November 18, 1994 between the Governments of the United States and the Republic of Colombia.

A notice published in **Federal Register** on June 23, 1995 (60 FR 32652) announces a limit for cotton and man-made fiber underwear in Categories 352/652 for the period March 29, 1995 through March 28, 1996. Textile products in Categories 352/652 and 444 shall be covered under the Andean Special Access Textile Program for products which are assembled in Colombia from fabric wholly formed and cut in the United States that are intended for re-export to the United States. The Special Access limit for Categories 352/652 and 444 shall be 22,500,000 dozen (restraint period April 1, 1995 through December 31, 1995) and 201,000 numbers (restraint period January 1, 1995 through December 31, 1995), respectively. There is a sublimit of 2,250,000 dozen for Categories 352/652 and a sublimit of 80,400 numbers for Category 444 for products that are not assembled from U.S. formed and cut fabrics.

The United States and the Republic of Colombia agree to establish a visa and Andean Special Access Textile Program certification system to be implemented no later than October 1, 1995. Further notice will be published in the **Federal Register** concerning the implementation of the visa and certification system.

Products subject to the Andean Special Access Textile Program shall be assembled in Colombia from fabric wholly formed and cut in the United States for re-export to the United States under contracts governed by HTSUSA 9802.00.8015; or assembled in Colombia from fabric wholly formed and cut in the United States, and then subject to bleaching, acid washing, stonewashing, garment dyeing, or permapressing in Colombia following assembly, for re-export to the United States under contracts governed by Statistical Headnote 5 to Chapter 61 of the Harmonized Tariff Schedule of the United States Annotated, and Statistical Headnote 3 to Chapter 62 of the Harmonized Tariff Schedule of the United States Annotated, as implemented by the Government of the United States requiring the use of the statistical prefix "H."

Shipments of cut parts in Categories 352/652 and 444 must be accompanied by a form ITA-370P, signed by a U.S. Customs officer, prior to export from the United States for assembly in Colombia in order to qualify for entry under the Special Access Program.

Requirements for participation in the Special Access Program are available in **Federal Register** notices 51 FR 21208,

published on June 11, 1986; 52 FR 26057, published on July 10, 1987; and 54 FR 50425, published on December 6, 1989.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to amend the current limits for Categories 315 and 443; and establish a limit for Categories 352/652 for the period April 1, 1995 through December 31, 1995 and Category 444 for the period January 1, 1995 through December 31, 1995.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

## DEPARTMENT OF DEFENSE

### Department of the Army

#### Draft Environmental Impact Statement (EIS) on the Disposal and Reuse of the BRAC Parcel at Tooele Army Depot, Tooele, Utah

**AGENCY:** Department of the Army, DOD.

**ACTION:** Notice of Availability.

**SUMMARY:** The proposed action evaluated by this EIS is the disposal of the 1700 acre BRAC parcel at Tooele Army Depot, Tooele, Utah in accordance with the Defense Base Closure and Realignment Act of 1990, Public Law 101-510. The Draft EIS addresses the environmental consequences of the disposal and subsequent reuse of the 1700 acres. Three alternative methods of disposal are analyzed: Encumbered Disposal, Unencumbered Disposal and retention of the property in a caretaker status (i.e., the No Action Alternative). The Encumbered Disposal Alternative addresses natural or man-made encumbrances to the future reuse. The Unencumbered Disposal Alternative evaluates the potential to remove encumbrances, thereby allowing the property to be disposed of with fewer or no Army imposed restrictions on future use. The impacts of reuse are evaluated in terms of land use intensities.

A scoping meeting was held at the Tooele Senior Citizen's Center on October 29, 1994. Public notices requesting input and comments from
